2020 OTOLARYNGOLOGY FELLOWSHIPS
SYDNEY, AUSTRALIA

Head and Neck (12 months)
Rhinology, Rhinoplasty, Anterior Skull Base (12 months)
Commencing Term 1, February, 2020

Westmead Hospital, Sydney
University of Sydney

The Sydney Otolaryngology Fellowships, based at Westmead Hospital, Sydney, are due to open for applications for 2020. Expressions of interest are invited from candidates interested in a future career in:

1) Tertiary Head and Neck Surgery
2) Tertiary Rhinology, Rhinoplasty and Anterior Skull Base

This includes activity at Westmead Adult Public Hospital, Westmead Private Hospital, Macquarie University Hospital, The Chris O’Brien Lifehouse, Lakeview Private Hospital and The Medical School of the University of Sydney.

The positions are funded. Subsidised on-campus accommodation is available for successful candidates and their families.

Westmead is Australia’s largest healthcare & medical research precinct, incorporating (in one location):

- Westmead Adult Hospital (A principal tertiary referral hospital for Greater Sydney and Regional NSW), currently undergoing a $1Billion redevelopment (http://www.westmeadproject.health.nsw.gov.au/)
- The Children’s Hospital at Westmead (A principal tertiary referral paediatric hospital for Greater Sydney and Regional NSW)
- Westmead Private Hospital (One of Australia’s leading tertiary referral private hospitals)
- The Medical School of the University of Sydney (Australia’s oldest and largest medical school)
- The Westmead Research Hub (One of the Southern Hemispheres largest medical research facilities, including 3 separate organisations – The Westmead Millennium Institute, The Children’s Medical Research Institute and the Kid’s Research Institute)
- The Dental School and Dental Hospital of the University of Sydney
Westmead is the direct referral centre for around 10% of the Australian population. Greater Western Sydney is the fastest growing population centre in Australia and the fastest growing economy, generating nearly 100 billion dollars annually.

The Westmead ENT Dept is unique in that all of our staff surgeons are tertiary sub-specialists, all having undertaken 2-3 year recognised international fellowships and all having completed (or in the process of completing) a post-graduate research degree.

Westmead’s ENT service is one of the largest and busiest Units in Australia with Six (6) tertiary Head and Neck Surgeons, Three (3) tertiary Rhinologists/ Anterior Skull base Surgeons, Three (3) Reconstructive Surgeons, and a newly-built, multi-disciplinary comprehensive cancer care centre including all facilities on-site.

These positions offer the successful applicants the following:

- Well-resourced department, including fellows, registrars, junior staff and dedicated ENT specialist nurse practitioners/ nurses.
- Tertiary subspecialists in all fields of Otolaryngology, including head and neck, rhinology, anterior skull base, neuro-otology and lateral skull base.
- Immediate motorway access, a train-station and a bus station on-site.
- The precinct is adjacent to an 85 hectare national heritage listed park.
- The adjacent Parramatta CBD is considered Australia’s 3rd largest city centre.
- Some of the best performing private and public schools in Sydney (eg: James Ruse – ranked number 1 in NSW/ Baulkham Hills High – ranked number 6 in NSW).

**HEAD & NECK**

- Multidisciplinary approach to benign and malignant head and neck disorders
- Statewide referral centre for complex and advanced cases
- Transoral laser microsurgery
- Thyroid / Parathyroid/ Salivary Surgery
- Complex airway reconstruction
- Participation in clinical research
- Active teaching program

**RHINOLOGY, RHINOPLASTY, ANTERIOR SKULL BASE**

- Complex/ Advanced/ Extended Endoscopic Sinus Surgery
- Cosmetic and functional rhinoplasty
- Anterior skull base/ endoscopic neurosurgery
- Surgery for OSA and snoring
- Statewide referral centre for complex and advanced cases
- Participation in clinical research and active teaching program
- Participation in tertiary rhinology-specific industry-sponsored drug and device trials (Currently involved in 3 major international multi-centre trials)

Expected requirements:

- Full unrestricted registration as an Otolaryngologist in applicant’s country of residence (For UK applicants, must have completed CCT at the time of commencing fellowship).
- No impediments to registration and recognition in Australia as an Otolaryngology Fellow.
- A demonstrated interest in chosen subspecialty.
- A demonstrated interest in publication, presentation and research.
- A demonstrated interest in teaching (Accredited trainees, Non-accredited junior staff and Medical students).
