Applications for the August 2018 post is now open. This post has been approved by the Royal College of Surgeons of England (RCSEng) and the British Association of Otorhinolaryngology – Head and Neck Surgery (ENTUK) to have met the standards of the Senior Clinical Fellowship Scheme. This fellowship is included on the RCSEng National Fellowship Register (https://www.rcseng.ac.uk/education-and-exams/accreditation/rcs-senior-clinical-fellowship-scheme/national-surgical-fellowship-scheme-register/otolaryngology/). The candidate must be eligible for registration with the General Medical Council. Further details are available on the GMC website (http://www.gmc-uk.org/).

This is a busy clinical fellowship aimed at senior ORL-HNS trainees who have at least four years experience, and hold the MRCS(ENT) (or equivalent) and preferably a national exit examination for ORL-HNS (FRCS equivalent).

It is intended that the successful candidate will become trained in all aspects of rhinology, advanced endoscopic sinus surgery and rhinoplasty. The candidate will gain exposure and experience to anterior skull base and extended endoscopic anterior skull base surgery. Significant exposure to external septorhinoplasty is also expected. The successful candidate will have a central role in the preparation and presentation of patients in the Skull Base Multi-Disciplinary Team meetings.

It is expected of the fellow to become involved with data collection, updating existing database and publish on clinical outcomes of the rhinology unit. There will be numerous research and clinical audit opportunities for the successful candidate to become involved in during their time in the unit, as well as collaborative research projects with the University of Liverpool and the Liverpool School of Tropical Medicine.

Applications to the **Visiting Rhinology Fellowship Programme** is currently open. This is aimed at trainees who wish enhance their professional development in both medical and surgical rhinology. These fellowships are available for 3 months (subject to hospital approval) and do not include hands-on clinical exposure, although the visiting fellow is expected to complete a research project during their tenure.
